Leaf: Module–Trait Correlations
WGCNA module (colour + dominant GO biology)
turquoise (n=2037)
Chromatin / nucleosome
tan (n=41)
Oxidative stress (peroxidase)
greenyellow (n=46)
Chitinase / defense
red (n=202)
RNA processing
yellow (n=238)
(no GO enrichment)
grey (n=270)
(no GO enrichment)
green (n=209)
Protein ubiquitination
black (n=187)
Photosynthesis & ribosome
magenta (n=150)
Transcription / ethylene
pink (n=152)
Cell wall / glucan
purple (n=109)
Fe–S cluster / biosynthesis
brown (n=347)
Lignin / phenolic metabolism
blue (n=1012)
Phosphate starvation / transport
