Adv-Root: Module–Trait Correlations
WGCNA module (colour + dominant GO biology)
turquoise (n=1768)
Oxidative stress (peroxidase)
pink (n=141)
Transcription / ubiquitination
salmon (n=54)
Cell cycle / mitosis
purple (n=109)
Cellulose biosynthesis
yellow (n=359)
(no GO enrichment)
midnightblue (n=43)
Membrane transport
lightcyan (n=36)
Protein phosphorylation
grey (n=59)
(no GO enrichment)
tan (n=61)
(no GO enrichment)
greenyellow (n=82)
Microtubule / nucleus
brown (n=439)
Lipid / GTPase signalling
cyan (n=50)
Photosynthesis (light harvesting)
red (n=212)
(no GO enrichment)
black (n=169)
Nucleus
green (n=287)
Cell wall biogenesis
blue (n=998)
RNA processing
magenta (n=133)
Terpenoid biosynthesis
